

SPECIFICATION

Please amend the paragraph on page 6, lines 16-22 of the specification to read:

The free end of the swing arm 14 is provided with a mounting piece 38, formed with 90° and 45° surfaces, ~~[[26]]~~ 22 and 24 respectively, and with pins ~~[[36]]~~ 26 projecting normal thereto, thus providing mounting features essentially identical to the features provided by the lobe 20 on the forward portion 16 of the back member 10. A curved bearing surface 40 on the hub portion 32 of the arm 14 cooperates with the bearing surface 28 on the lobe 20 to define the fully downwardly rotated, operative position of the arm
